

INCREASE ACCURACY

On-Screen Takeoff® increases accuracy and efficiency, which in turn helps you to win more profitable bids.

Hands on Training with OST will be on the basics to many advanced features, tips tricks and shortcuts.

This colorful yet intuitive software allows estimators to generate faster & more accurate take-offs while providing an audit trail.

INCREASE EFFICIENCY

Instructor: Ed Wenz has been a conceptual estimator for Reno Contracting Inc. for about five years. With a subcontracting background in the construction industry for the past 25 years as superintendent, project manager and chief estimator, Ed has since migrated into the general contracting side of the industry as an estimator for the past seven years and enjoys the perspective of having worked on both sides of the contracting fence. With his extensive expertise in estimating programs and takeoff systems Ed has led Reno Contracting through a transition of technological refinements including the use of On-Screen Takeoff.
