**March 31 - Reduced Activity
Reporting Deadline!**

***Please join the
AGC***

For a Training Session Relating to

***California's Off-Road and on-Road
Diesel Emissions Regulations***

Wednesday, February 24, 2010

9:00 AM to 12:00 Noon

@ AGC

6212 Ferris Square

San Diego, CA 92121

In our continuing series of "how to" workshops on the California Air Resources Board (CARB) Off-Road and On-Road Diesel Emissions regulations, AGC will hold a workshop to provide fresh information on how CARB will enforce the March 1 compliance date for large off-road truck fleets, and the March 31 reporting deadline for the reduced activity credit for large fleets. Information will also be provided about the on-road diesel truck rules, as well as the Portable Equipment Registration Program (PERP).

Sean Edgar of www.CleanFleets.Net will once again provide a thorough analysis of the CARB regulations, and what they mean for contractors and the construction industry. This "hands-on" session will provide compliance and reporting assistance, as well as fresh guidance on what relief may be available. Sean also will provide AGC and its members with extended educational and compliance services as the regulations continue to be implemented.

Registration Form – No Charge!
