

**AGC 2007**  
**ELECTRONIC AGE COMMITTEE**

CHAIR: Ed Wenz, *Reno Contracting*

STAFF: Jessica Kovack  
Jim Ryan

MEETS: To be established by the Committee

**JOB DESCRIPTION:**

This is a new committee created in 2007. Members are asked to provide the industry leadership and direction in the following areas:

Identify, explore, and critique the construction industry's technology trends and information needs.

- The committee is charged with the responsibility to identify, explore and critique the new trends in which technology advancements will help make the construction industry operate on a more efficient and effective basis. In this capacity, the committee will be charged with researching new and better means and methods that will help the industry now and in the future.
- Provide the industry technological training and education.
- The committee is charged with utilizing the information generated in #1 and developing a training and educational program that will allow members to view new technologies and to be trained in their usage. The committee should utilize the technological training facilities in the AGC building.

Topics should include, but not limited to: paperless technology, communications, industry software, (i.e. accounting, project management, estimating, takeoff, scheduling, etc.)
