Building Information Modeling (BIM) is changing the way projects are constructed. Whether you are a prime contractor using BIM across an entire project or a subcontractor impacted by a specific BIM implementation, this emerging practice requires new mindsets and technological know-how in order to achieve significant improvements in efficiency and cost control.

AGC's BIM Education Program — developed in conjunction with leading BIM practitioners, technology firms and educators—is designed to prepare construction professionals at all experience levels to successfully implement BIM on a construction project.

Unit 1 - An Introduction to Building Information Modeling (3rd Edition)

AGC's Unit 1: An Introduction to Building Information Modeling is a full-day course that provides a comprehensive overview of BIM practices and terminology while introducing important concepts necessary to understand how BIM is changing the construction process.

Unit 2 - BIM Technology (3rd Edition)

Unit 2: BIM Technology is a full-day course designed to provide a neutral introduction to BIM tools. Throughout the course, tools are introduced as they relate to the functions they perform, as well as particular phases in a project where they have the strongest capabilities. By understanding these differences, it is possible for each attendee to determine what questions need to be asked prior to making an investment in technology.

Unit 3 - BIM Project Execution Planning (3rd Edition)

Unit 3: BIM Project Execution Planning is a full-day course that examines BIM and contract terminology to determine best practices for integrating BIM use into project execution planning. Core project execution planning activities are discussed and practiced to help participants become BIM champions within their organizations.

Unit 4 - BIM Adoption, Implementation, and ROI (3rd Edition)

Unit 4: BIM Adoption, Implementation, and ROI is a full-day course that provides a foundation for participants to establish and execute the BIM process, facilitate its adoption, and achieve integration on a single project and at a company level to execute multiple BIM projects simultaneously. These tools will help establish participants as BIM champions within their organizations.

The highly interactive program provides 32-hours of instruction and training to get construction industry professionals at all levels ready to take advantage of the benefits of BIM. After participants complete all four courses in the program they become eligible to sit for an exam to earn the **Certificate of Management - Building Information Modeling (CM-BIM)**.

Registration: Registration must be completed online at www.AGCSD.org. All AGC Chapters receive the AGC San Diego Member Rate. Registration and Confirmation will be determined 14 days prior to the course date.

Cancellations and/or Changes Policy: Cancellation notification must be received in writing no later than 14 days prior to the scheduled course date. Substitute registrants can be named at any time. A full refund - minus a 5% processing fee if paid by credit card - will be given if notification is received by AGC San Diego 14 days prior to the course start date. If a cancellation is NOT received within the 14 day cancellation time frame, or if registrant(s) elects not to attend, attendee (Company) will forfeit the entire course fee. Please note: Registration and Confirmation will be determined 14 days prior to the course date.

Payment: Payment can be made online by credit card or PayPal. Master Card, Visa, Discover and American Express are accepted. Checks to be made payable to AGC San Diego. Invoice option is only available for AGC San Diego Chapter members. Full course payment must accompany each registration for all attendees at least seven days prior to the course start date. Contact Inna Alizade in Accounting for payment confirmations, refunds or receipts. inna@agcsd.org

Certificate of Management - Building Information Modeling

The AGC Certificate of Management-Building Information Modeling (CM-BIM) is an assessment-based certificate credential that denotes knowledge and understanding of concepts related to BIM adoption, practice and process transformation outlined in the AGC BIM Education Program. Successful candidates will carry the CM-BIM designation.

CM-BIM
CERTIFICATE OF
MANAGEMENT
BUILDING INFORMATION MODELING

Eligibility Requirements: CM-BIM candidates must successfully complete the four AGC BIM Education Program courses, provide AGC with record to completion and have an approved application in advance of exam administration.

For more information visit www.AGC.org/CM-BIM.

"Earning my CM-BIM means that I can be considered a trusted source of all things BIM related to my company, and for our clients."

Harry McKinney CM-BIM, AIA, DBIA
Virtual Design Construction Manager
Clancy & Theys Construction Company

"This has opened the doors to opportunities of potential work. This is all part of delivering a complete package for our customers."

Darin Marsden CM-BIM
Director of Virtual Construction
Faith Technologies, Inc.

How to Access BIM EP & CM-BIM

BIM EP courses are offered by AGC Chapters and at BIM industry events throughout the country. Find BIM EP course dates and AGC Chapter locations by visiting the Nationwide Calendar at www.AGC.org/BIM. For CM-BIM application and testing information visit www.AGC.org/CM-BIM.

AGC developed the BIM Education Program and CM-BIM credential at the request of our 27,000 members, who are dedicated to advancing the ever-changing agenda of commercial construction contractors, improving jobsite safety, expanding the use of cutting-edge technologies and techniques and strengthening the dialogue between contractors and owners.
